1 – 21 Canceled.

22. (Currently Amended) A method for reporting capabilities of a dual-mode wireless transmit/receive unit (WTRU) to a wireless communication network, comprising:

said WTRU informing said network of services said WTRU is capable of supporting;

said network providing services offered to said WTRU; and

said WTRU selecting one of said dual modes to receive services; and

~~The method of claim 14,~~

wherein said WTRU, when selectively receiving a communication card removably inserted to said WTRU for supporting one of a plurality of WLAN communication protocols:

provides a message network identifying the inserted communication card.

23. (Original) The method of claim 22, wherein said communication protocols include WLAN 802 protocols and said message identifies the protocol supported by the WTRU.
